Assignment 7: Sample Data Insertion

COLLEGE MANAGEMENT SYSTEM

DBMS Assignment 7

Database: CollegeManagementSystem

SQL Platform: MySQL 8.0.16 or later

Project scope: departments, faculty, students, courses, and enrollments.

Note: Query outputs described in this report are expected results from the included fictional sample data. Run the SQL script in MySQL Workbench and capture actual screenshots if your instructor requires them.

Objective

Populate every table with fictional sample data that represents a small college.

Insertion order

Insert Departments first, then Faculty and Students, then Courses, and finally Enrollments. This satisfies parent-child foreign-key requirements.
